

Activated Carbon for Aquatics

DOSHION AquaCarb is a special form of activated carbon manufactured by Doshion for aquariums and other aquatic applications. AquaCarb is granular in nature and has very high absorption capacity. Doshion AquaCarb is made from Coconut Shell to form microporous structure and maximize the surface area. AquaCarb can be used to remove various organics from the water and can be kept installed for a long time in the filtration system without any adverse effect.

The Characteristics of Doshion AquaCarb Media:

- Effectively removes Organic substances and chemicals from water.
- Granular structure and high hardness ensure long life.
- Can also remove COD and Colour from water.
- Renewable and green raw material.
- Excellent purity, exhibiting less than 3 – 5% ash content, so as to not cause any major impact on pH.

Properties	
Type	Activated Carbon media
Appearance	Black odourless
Physical Form	Granular
Particle Size distribution (mm)	8 x 30 Mesh Size
Bulk Density (gm/ CC)	0.55 ± 0.1
Solubility	Insoluble in water and organic solvents.
pH	8 – 11

How to use: It can be put in filter bags of appropriate mesh size to allow maximum flow through the media, bags can be placed in a filter, media chamber, box filter, or any high flow area of a trickle filter.

Storage: Keep it in a cool ambient place away from direct sunlight.

Packaging: 100 mL, 250 mL, 500 mL, 1L, 2L and 5L

Full Range of Aquatic Media

Product	Application
CuRid	Removal of Copper and various other Heavy Metals
AmmoStop	Removal of Ammonia, Nitrates, Nitrites & organics
OrgaNil	High Capacity Organic removal media
AquaCarb	Activated Carbon for Microbial Control and Organics Removal
PhoSil Guard	Removal of Phosphate and Silica
Aquagen 500	High capacity premium media for removal of Organics, Nitrates, Nitrites and Ammonia
PhoCarb	50:50 blend of AquaCarb and PhoSil Guard
ArNil	Arsenic and Phosphate Removal
FeNil	Iron Removal from Water
DeMin	Complete TDS Removal/ For Demineralized water
