

Low pH RO Membrane Cleaner

DCC- INOR is a proprietary cleaning formulation that is effective in removing organic matter and foulants as well as inorganic colloids. The product includes a combination of chelants for iron, manganese, copper, aluminium magnesium, zinc, barium, and calcium sequestration. DCC- INOR contains a surfactant which helps to have extra wetting ability and thus providing an effective cleaning.

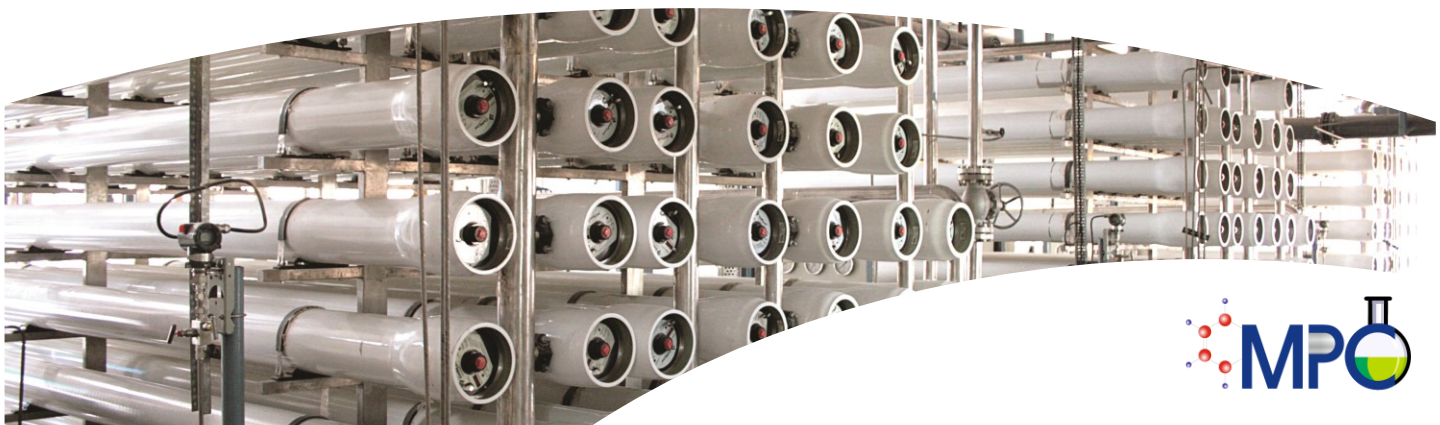

DCC- INOR can be used alone or in combination with other acidic DB cleaning formulations when cleaning inorganic scales or foulants from the membrane. DCC- INOR is an acidic product and is formulated to be used on both thin-film composite and cellulose-acetate membranes.
