

De-chlorination Chemical for RO

Doshion 51 is one of the principal chemical used by the industry for the effective de-chlorination in the pre treatment of reverse osmosis systems. Doshion 51 is an excellent chemical suggested for membrane systems for removal of free chlorine.

Doshion 51 is a highly effective chemical suggested use to remove free chlorine from the feed water, which hydrolyses the membrane leading the membrane damage.

Advantages:

- Highly effective de-chlorinator
- Eliminates FRC- increased membrane life
- Low dose rate gives a cost effective application
- Compatible with all membrane types
