

Organic Removal Media

DOSHION OrgaNil is a special media manufactured by Doshion for removal of Organic substances from aquariums. OrgaNil is spherical in shape to provide high strength and surface area. OrgaNil is a fast acting media and can be used to rapidly remove Organic Substance from the water.

The Characteristics of Doshion OrgaNil Media:

- Effectively removes Organic substances from water.
- Once the media is exhausted, it can be reused through regeneration
- Spherical bead shapes help in maximizing surface area for best results.
- Much more effective than Activated Carbon or other similar media.
- Can also remove Cloudiness and Colour from water.

Properties	
Type	Synthetic Adsorbent media
Colour	White to Off – White
Physical Form	Spherical granules
Particle Size distribution (mm)	300 to 1200 microns
Shipping weight (gm/ ltr)	680 – 710
Maximum Operating Temperature	60 °C 140 °F

How to use: It can be put in filter bags of appropriate mesh size to allow maximum flow through the media, bags can be placed in a filter, media chamber, box filter, or any high flow area of a trickle filter.

Storage: Keep it in a cool ambient place away from direct sunlight.

Packaging: 100 mL, 250 mL, 500 mL, 1L, 2L and 5L

Full Range of Aquatic Media

Product	Application
CuRid	Removal of Copper and various other Heavy Metals
AmmoStop	Removal of Ammonia, Nitrates, Nitrites & organics
OrgaNil	High Capacity Organic removal media
AquaCarb	Activated Carbon for Microbial Control and Organics Removal
PhoSil Guard	Removal of Phosphate and Silica
Aquagen 500	High capacity premium media for removal of Organics, Nitrates, Nitrites and Ammonia
PhoCarb	50:50 blend of AquaCarb and PhoSil Guard
ArNil	Arsenic and Phosphate Removal
FeNil	Iron Removal from Water
DeMin	Complete TDS Removal/ For Demineralized water
